

Press release Calendar Week 04/I

Slippery surfaces?

Rameder has tyre chains for many sizes

Tyre chains were first patented in 1904, since when a lot of progress has been made. The principle, however, is still the same: on snow-covered roads and in muddy terrain, chains provide grip and prevent the wheels from spinning. **Rameder** therefore has tyre chains for many a make and tyre size.

Rameder's wide range notwithstanding, you will easily find the right chain, either by using the manufacturer or type key number in your registration certificate or by entering the manufacturer, make, engine and tyre size. The compatible products will then be displayed and, given our huge stocks, also delivered soon.

So you will find the right tyre chain easily and in a jiffy. Be it a conventional chain or the "world's fastest" – **Rameder** leaves nothing to be desired. You can buy all products at www.rameder.eu.
