Carry your Christmas tree safely Rameder tips and products for securing your load

Before Christmas, the question is how to get your Christmas tree into your living room. Not all luggage compartments provide enough space for such an enterprise. So, you must use your car's roof or a trailer. **Rameder**, Europe's market leader when it comes to towbars and transport accessories, has a few tips for you and at www.rameder.eu, its online shop, also many products to secure your load.

First of all, always heed the pertinent regulations. In the European countries, it is usually prescribed how much your cargo may extend beyond the roof of a car. Any violation will make you face a fine. Even when buying your Christmas tree, you should see to it that you can transport it in a lawful manner.

Once you have put it on your [roof rack](#) – **Rameder** has a lot on offer – you must secure it. Otherwise, if you brake hard or in case of an accident it may put others in jeopardy. That's why **Rameder** sells both [safety nets](#) and [lashing straps](#) to secure the tree, preferably with its top pointing backwards to protect the branches from the airstream.

If the tree fits neither in the boot nor on the roof, you must use a trailer. Needless to say, the tree must again be secured lest it becomes loose and endangers others.

And, of course, **Rameder's** online shop, www.rameder.eu, has many other transport solutions. Pay it a visit!
