"Heavy transport" with ease

Rameder has versatile bike carriers for eBikes in its product range

Long before the triumph of eBikes in recent years, there were the first bicycles with electric pedalling assistance. Similar concepts have been developed since before 1900, corresponding to the current models in many points. Since then, not only the bikes but also the transport options have evolved considerably. **Rameder**, Europe's market leader for towbars and transport solutions for cars, has a large selection of eBike carriers. Numerous such products which can handle both standard bikes and heavy eBikes, without any problem can be found in the online shop at www.rameder.eu.

However, the extra weight of the batteries also poses new challenges. For example, this makes it almost impossible to transport the bikes on a roof rack. **Rameder** bike carriers for towbars can help here a lot. These also make optimal use of the slipstream of the vehicle and the bicycles no longer have to be lifted but can be loaded directly onto the carrier.

At **Rameder**, for example, the [Atlas 2 Premium](#) is available for 339 Euro. This model can be attached with a few simple steps and supports up to two bicycles or eBikes. Of course, it comes with reliable theft protection for both the cargo and the carrier. The folding mechanism (up to 60°) also makes it possible to open the car hatch, even if bicycles are mounted. If necessary, the angle can be increased up to 80° using the [Extension kit](#) available for only 14.99 Euro.

Another practical eBike carrier is the Model [Bike Lift](#), available for 699 Euro. An electric drive allows the carrier to be lowered at the touch of a button, thus guaranteeing the effortless loading of the occasionally heavy eBikes. Due to the rollers on the underside, the TÜV-tested product can of course also be dismantled without problems and assures easy transportation. A corresponding lock system is also installed, which protects both the carrier and the bikes from any unauthorised access.

Interested customers can find a large selection of models in the **Rameder** shop, at www.rameder.eu, in the category [eBike carriers](#). The shop also includes many other products for towbars and numerous transport solutions for the car. A visit is always worthwhile.
